INSTALLATION

STEP 1:

Inspect shipping package and contents to ensure no damage has occurred during shipping.

Adjustable Bracket Mount

STEP 2a:

Loosen each M4 pinch bolt (2x) slightly using a 3mm hex key to allow some free movement. This will allow for easier installation on uneven or other surfaces.

*Be sure not to loosen the pinch bolts too far, as they will disengage.

STEP 2b:

Mount luminaire to desired location with four 1/4"-20 (4x) screws or bolts (not provided).

STEP 2c:

Adjust luminaire to desired angle and tighten M4 pinch bolts (2x) using a 3mm hex key.

NOTE:

If application requires periodic adjustment of aiming do not rotate more than 180° in either direction from installation point, doing so may put excessive strain on the electrical connections.

Continue to Step 3.

Mounting Dimensions:

GS-1: 368mm ± 2 [14.5in ± 0.1]

GS-2: 648mm ± 2 [25.5in ± 0.1]

The cord connector must be rated for use with suitable cable of types SOW, STOOW, STOW, SEOW, SEOOW having a diameter between 8.75mm/0.345" & 9.4mm/0.370". The listed cord connector must be installed in a listed box complying with the NEC / CEC location requirements of the installation. The cord connector and box must be rated to the environment of the installation.

STEP 4:

Black: Negative (-)
 White: Positive (+)
 Green: Ground

Connect the lead wires from the cord to the field supply wiring inside the outlet box. The field wiring terminations are to be made following acceptable practices as outlined by the NEC / CEC for either the specific ordinary or hazardous locations as dictated by the installation location.
